

Stem and leaf plots

Wednesday, November 04, 2009

Stem and leaf plot: an arrangement of data; for two digit numbers, the tens digits are shown as stems and the ones digits are as leaves.

Example : 54, 52, 58, 68, 72, 61, 74, 82

Stem	Leaves
5	2 4 8
6	1 8
7	2 4
8	2

Start with the least number and record all stem and leaves in order from least to greatest.

Can identify mean, median, and mode as well as the range.
